

**LEGAL NOTICE OF INTENT TO ISSUE SIMPLE AIR CONTAMINANT DISCHARGE
PERMIT NO. 208932 (ACDP 208932)**

In accordance with Title 37 of Lane Regional Air Protection Agency's Rules and Regulations, the following facility has made application for a Simple Air Contaminant Discharge Permit. As a Simple ACDP source, the permit will contain Generic Plant Site Emission Limits (Generic PSELs) for all pollutants emitted at more than the de minimis level in accordance with LRAPA Title 42.

WILLAMETTE VALLEY SANDBLASTING (Renewal)
Sandblasting Operation
1250 Bertelsen Road, Eugene

Emissions will be limited by the permit to:

PM = 24 tons per year; PM10 = 14 tons per year;
PM2.5 = 9 tons per year.

None of these emission limits exceed the Significant Emission Rate (SER) established by Lane Regional Air Protection Agency (LRAPA).

The following table presents maximum allowable emissions of criteria pollutants for the facility. The current emission limit reflects maximum emissions the facility can emit under the existing permit. The proposed emission limit reflects maximum emissions the facility would be able to emit under the proposed permit. Typically, a facility's actual emissions are less than the maximum limits established in a permit; however, actual emissions can increase up to the permitted limit.

Criteria Pollutant	Current Limit (tons/year)	Proposed Limit (tons/year)
Particulate matter	24	24
Small particulate matter	14	14
Fine particulate matter	9	9

For more information about criteria pollutants, go to EPA's "[Criteria Air Pollutants](#)" page.
