

**LEGAL NOTICE OF INTENT TO ISSUE A CONSTRUCTION CONTAMINANT
DISCHARGE PERMIT NO. 207506 (TV-207506)**

In accordance with Title 37 of Lane Regional Air Protection Agency's (LRAPA) Rules and Regulations, the following facility has submitted an application for a modification as a Construction Air Contaminant Discharge Permit (C-ACDP) to the current Title V.

SFPP, L.P. – Eugene Terminal (C-ACDP)
Gasoline Bulk Terminal
1765 Prairie Road, Eugene, Oregon

Emissions will be limited to the Generic PSEL level for all pollutants except VOC which is set at a source-specific emission level:

PM	= 24 tons per year;	PM ₁₀	= 14 tons per year;
PM _{2.5}	= 9 tons per year;	NO _x	= 39 tons per year;
CO	= 99 tons per year;	VOC	= 472 tons per year;
GHG	= 74,000_tons per year.		

None of these emission limits will result in an increase over the netting basis that exceeds the Significant Emission Rate (SER) established by LRAPA.

The following table presents maximum allowable emissions of criteria pollutants for the facility. The current emission limit reflects maximum emissions the facility can emit under the existing permit. The proposed emission limit reflects maximum emissions the facility would be able to emit under the proposed permit. Typically, a facility's actual emissions are less than the maximum limits established in a permit; however, actual emissions can increase up to the permitted limit.

Criteria Pollutant	Current Limit (tons/year)	Proposed Limit (tons/year)
Particulate matter	0	24
Coarse particulate matter	0	14
Fine particulate matter	0	9
Carbon monoxide	0	99
Nitrogen oxides	0	39
Volatile organic compounds	472	472
Greenhouse gases	NA	74,000

For more information about criteria pollutants, go to EPA's "[Criteria Air Pollutants](#)" page.

LRAPA has prepared and proposes to issue a permit to this company. The Draft Permit and Review report are located for review on the LRAPA website at www.lrapa.org.

Anyone desiring to submit information concerning the application or proposed permit which might assist LRAPA in concluding the issuance of a permit for the above-listed company is urged to do so. Any comments must be submitted by **5:00 p.m. on:**

December 26, 2019

If written requests from 10 persons, or an organization representing at least 10 persons, are received on this application, LRAPA will provide a public hearing. Requests for hearing need to clearly identify the air quality concerns about the draft permit. **Requests for hearing must be in writing and must be received no later than 5:00 pm, on**

December 26, 2019

All written comments received will be considered in LRAPA's final action on this permit application. LRAPA will review all information received during the public review period, and the hearing (if requested). Following this review, the permit may be modified. The proposed permit will then be forwarded to EPA for comment prior to issuance.
