

**Rosboro, LLC – Springfield Facility**  
**2509 Main Street**  
**Springfield, Oregon**  
**Has applied for a renewal of Lane Regional Air Protection Agency**  
**Title V Operating Permit**  
**(Number 207050)**

Lane Regional Air Protection Agency (LRAPA) has conducted a preliminary review of this facility’s renewal application and is providing an opportunity for public comment. The facility manufactures wood products including dimensional lumber and laminated beams.

The draft permit contains emission limits for the following criteria pollutants:

PM = 178 tons per year;	PM <sub>10</sub> = 171 tons per year;
PM <sub>2.5</sub> = 123 tons per year;	NO <sub>x</sub> = 181 tons per year;
CO = 274 tons per year;	VOC = 230 tons per year;
SO <sub>2</sub> = 39 tons per year;	HAP <sub>single</sub> = 9 tons per year;
GHG = 81,740 tons per year	HAP <sub>aggregate</sub> = 24 tons per year

The facility is located in the Eugene-Springfield Maintenance Area for PM<sub>10</sub> and CO. More information on this facility’s emissions is contained in the review report.

The following table presents the maximum allowable emissions of criteria pollutants for the facility. The current emission limits reflect maximum emissions the facility can emit under the existing permit. The proposed emission limits reflect maximum emissions the facility would be allowed to emit under the proposed permit. Typically, a facility’s actual emissions are less than the maximum limits established in a permit; however, actual emissions can increase up to the permitted limit.

Criteria Pollutant	Current Limit (tons/year)	Proposed Limit (tons/year)
PM (Particulate Matter)	268	178
PM <sub>10</sub> (Small particulate matter)	249	171
PM <sub>2.5</sub> (Fine particulate matter)	146	123
CO (Carbon monoxide)	300	274
NO <sub>x</sub> (Nitrogen oxides)	201	181
SO <sub>2</sub> (Sulfur dioxide)	39	39
VOC (Volatile organic compounds)	227	230
GHG (Greenhouse gases)	NA	81,740
Individual HAPs	9	9
Aggregate HAPs	24	24

For more information about criteria pollutants, go to EPA’s [“Criteria Air Pollutants”](#) page.

LRAPA has prepared and proposes to issue a permit to this company. The Draft Permit and Review report are located for review on the LRAPA website at [www.lrapa.org](http://www.lrapa.org).

Anyone desiring to submit information concerning the application or proposed permit which might assist LRAPA in concluding the issuance of a permit for the above-listed company is urged to do so. Any comments must be submitted by **5:00 p.m. on, March 6, 2020**:

If written requests from 10 persons, or an organization representing at least 10 persons, are received on this application, LRAPA will provide a public hearing. Requests for hearing need to clearly identify the air quality concerns about the draft permit. **Requests for hearing must be in writing and must be received no later than 5:00 pm, March 6, 2020.**

All written comments received will be considered in LRAPA's final action on this permit application. LRAPA will review all information received during the public review period, and the hearing (if requested). Following this review, the permit may be modified. The proposed permit will then be forwarded to EPA for comment prior to issuance.
