

**Lane County Public Works –
Waste Management Division
Lane County Short Mountain Landfill
84777 Dillard Access Road
Eugene, Oregon**

**Has applied for a Lane Regional Air Protection Agency
Construction Air Contaminant Discharge Permit
(Number 204740)**

Lane Regional Air Protection Agency (LRAPA) has conducted a preliminary review of this facility’s modification application and is providing an opportunity for public comment. Activity at the facility consists of a municipal solid waste (MSW) landfill facility.

Emissions will be limited to the Generic PSEL level for all pollutants except GHG which is set at a source-specific emission level:

PM = 24 tons per year;	PM ₁₀ = 14 tons per year;
PM _{2.5} = 9 tons per year;	NO _x = 39 tons per year;
CO = 99 tons per year;	VOC = 39 tons per year;
SO ₂ = 39 tons per year;	H ₂ S = 9 tons per year;
NMOC = 49 tons per year;	GHG = 293,678 tons per year.

The following table presents maximum allowable emissions of criteria pollutants for the facility. The current emission limit reflects maximum emissions the facility can emit under the existing permit. The proposed emission limit reflects maximum emissions the facility would be able to emit under the proposed permit. Typically, a facility’s actual emissions are less than the maximum limits established in a permit; however, actual emissions can increase up to the permitted limit.

Criteria Pollutant	Current Limit (tons/year)	Proposed Limit (tons/year)
Particulate matter	24	24
Small particulate matter	14	14
Fine particulate matter	9	9
Carbon monoxide	99	99
Nitrogen oxides	0	39
Sulfur dioxide	0	39
Volatile organic compounds	39	39
H ₂ S	9	9
NMOC	49	49
Greenhouse gases	213,398	293,678

For more information about criteria pollutants, go to EPA's "[Criteria Air Pollutants](#)" page.

LRAPA has prepared and proposes to issue a permit to this company. The Draft Permit and Review report are located for review on the LRAPA website at www.lrapa.org.

Anyone desiring to submit information concerning the application or proposed permit which might assist LRAPA in concluding the issuance of a permit for the above-listed company is urged to do so. Any comments must be submitted by **5:00 p.m. on, May 31, 2022**:

If written requests from 10 persons, or an organization representing at least 10 persons, are received on this application, LRAPA will provide a public hearing. Requests for hearing need to clearly identify the air quality concerns about the draft permit. **Requests for hearing must be in writing and must be received no later than 5:00 pm, May 31, 2022.**

All written comments received will be considered in LRAPA's final action on this permit application. LRAPA will review all information received during the public review period, and the hearing (if requested). Following this review, the permit may be modified. The proposed permit will then be forwarded to EPA for comment prior to issuance.
