

**LEGAL NOTICE OF INTENT TO ISSUE SIMPLE AIR
CONTAMINANT DISCHARGE
PERMIT NO. 200058 (ACDP 200058)**

In accordance with Title 37 of Lane Regional Air Protection Agency's Rules and Regulations, the following facility has made application for a Simple Air Contaminant Discharge Permit. As a Simple ACDP source, the permit will contain Generic Plant Site Emission Limits (Generic PSELs) for all pollutants emitted at more than the de minimis level in accordance with LRAPA title 42.

Arcimoto, Inc. (New)
Ultra-efficient electric vehicle assembly facility
311 Chambers Street, Eugene

Emissions will be limited by the permit to the generic PSEL level for all pollutants. None of these emission limits exceed the Significant Emission Rate (SER) established by Lane Regional Air Protection Agency (LRAPA).

The following table presents maximum allowable emissions of criteria pollutants for the facility. The proposed emission limit reflects maximum emissions the facility would be able to emit under the proposed permit. Typically, a facility's actual emissions are less than the maximum limits established in a permit; however, actual emissions can increase up to the permitted limit.

Criteria Pollutant	Proposed Limit (tons/year)
Particulate matter	24
Coarse particulate matter (PM ₁₀)	14
Fine particulate matter (PM _{2.5})	9
Carbon monoxide	99
Nitrogen oxides	39
Volatile organic compounds	39

For more information about criteria pollutants, go to EPA's "[Criteria Air Pollutants](#)" page.

As a new source, the facility completed a health-based air toxics risk assessment under Cleaner Air Oregon. LRAPA has concluded the results of this level 1 risk assessment meet health risk standards for the community and do not require additional controls in order to be protective of public health. The proposed permit includes permit conditions that limit allowable emissions to maintain this protection.

The facility is considered a natural minor source of federal hazardous air pollutants. For more information about hazardous air pollutants, go to EPA's "[Hazardous Air Pollutants](#)" page.

LRAPA has prepared and proposes to issue a permit to this company. The Proposed Permit, Review Report, and Cleaner Air Oregon Risk Assessment are located for review on the LRAPA website at www.lrapa.org.

Anyone desiring to submit information concerning the application or proposed permit which might assist LRAPA in concluding the issuance of a permit for the above-listed company is urged to do so. Any comments must be submitted by **5:00 p.m. on:**

June 24, 2022
