

Swanson Group Mfg. LLC – Springfield Plywood/Veneer
1651 South F Street
Springfield, Oregon 97477
Has applied for a Lane Regional Air Protection Agency
Title V Operating Permit Renewal
(Number 207510)

Lane Regional Air Protection Agency (LRAPA) has conducted a preliminary review of this facility’s renewal application and is providing an opportunity for public comment. Activity at the facility consists of veneer and plywood products manufacturing.

The draft permit contains emission limits for the following criteria pollutants:

| | | | | | | | |
|-------------------|---|------------|----------------|-----------------|---|----------------|----------------|
| PM | = | <u>176</u> | tons per year; | NO _x | = | <u>90</u> | tons per year; |
| PM ₁₀ | = | <u>124</u> | tons per year; | SO ₂ | = | <u>39</u> | tons per year; |
| PM _{2.5} | = | <u>74</u> | tons per year; | VOC | = | <u>54</u> | tons per year; |
| CO | = | <u>125</u> | tons per year; | GHG | = | <u>130,000</u> | tons per year. |

The facility is located inside the Eugene Springfield Air Quality Management Area. The facility is located in an area that has been designated an attainment/unclassified area for PM_{2.5}, O₃, NO_x, SO₂ and Pb and a maintenance area for CO and PM₁₀. More information on this facility’s emissions is contained in the review report.

The following tables presents maximum allowable emissions of criteria pollutants and hazardous air pollutants for the facility. The current emission limit reflects maximum emissions the facility can emit under the existing permit. The proposed emission limit reflects maximum emissions the facility would be able to emit under the proposed permit. Typically, a facility’s actual emissions are less than the maximum limits established in a permit; however, actual emissions can increase up to the permitted limit.

| Criteria Pollutants | Current Limit (tons/year) | Proposed Limit (tons/year) |
|---|---------------------------|----------------------------|
| Particulate matter (PM) | 176 | 176 |
| Course particulate matter (PM ₁₀) | 124 | 124 |
| Fine particulate matter (PM _{2.5}) | 74 | 74 |
| Carbon monoxide | 161 | 125 |
| Nitrogen oxides | 89 | 90 |
| Sulfur dioxide | 39 | 39 |
| Volatile organic compounds | 80 | 54 |
| Greenhouse gases (CO ₂ e) | 74,000 | 130,000 |

| Hazardous Air Pollutants | Current Limit (tons/year) | Proposed Limit (tons/year) |
|--------------------------|---------------------------|----------------------------|
| Single HAP | 9 | 9 |
| Total HAP (aggregate) | 24 | 24 |

For more information about criteria pollutants, go to EPA’s [“Criteria Air Pollutants”](#) page. For more information about hazardous air pollutants, go to EPA’s [“Hazardous Air Pollutants”](#) page.

LRAPA has prepared and proposes to issue a permit to this company. The Draft Permit and Review report are located for review on the LRAPA website at www.lrapa.org.

Anyone desiring to submit information concerning the application or proposed permit which might assist LRAPA in concluding the issuance of a permit for the above-listed company is urged to do so. Any comments must be submitted by **5:00 p.m. on, July 13, 2022.**

If written requests from 10 persons, or an organization representing at least 10 persons, are received on this application, LRAPA will provide a public hearing. Requests for hearing need to clearly identify the air quality concerns about the draft permit. **Requests for hearing must be in writing and must be received no later than 5:00 pm, July 13, 2022.**

All written comments received will be considered in LRAPA's final action on this permit application. LRAPA will review all information received during the public review period, and the hearing (if requested). Following this review, the permit may be modified. The proposed permit will then be forwarded to EPA for comment prior to issuance.
